

Pollen patterns: source interpretation and numerical convergence

Smooth / unpatterned
 $q_0 = 1.5, \tau = 20$

RMS 0.00979 | L=96 | strictly convex energy

Finer foam
 $q_0 = 2, \tau = -20$

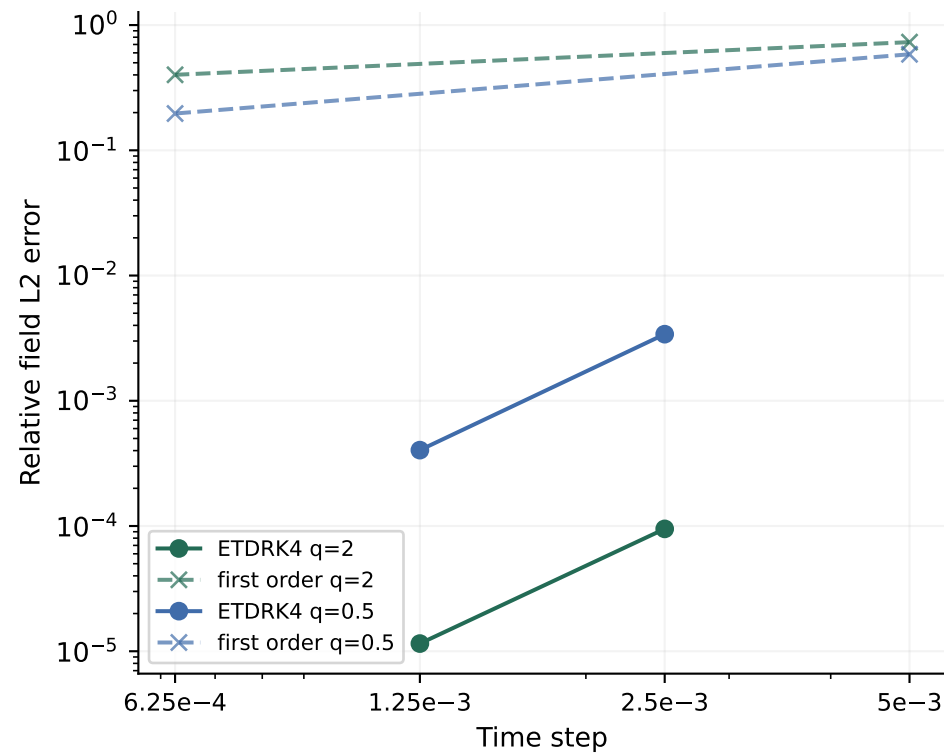

RMS 0.84871 | L=128 | 202 positive domains

Coarser foam
 $q_0 = 0.5, \tau = -20$

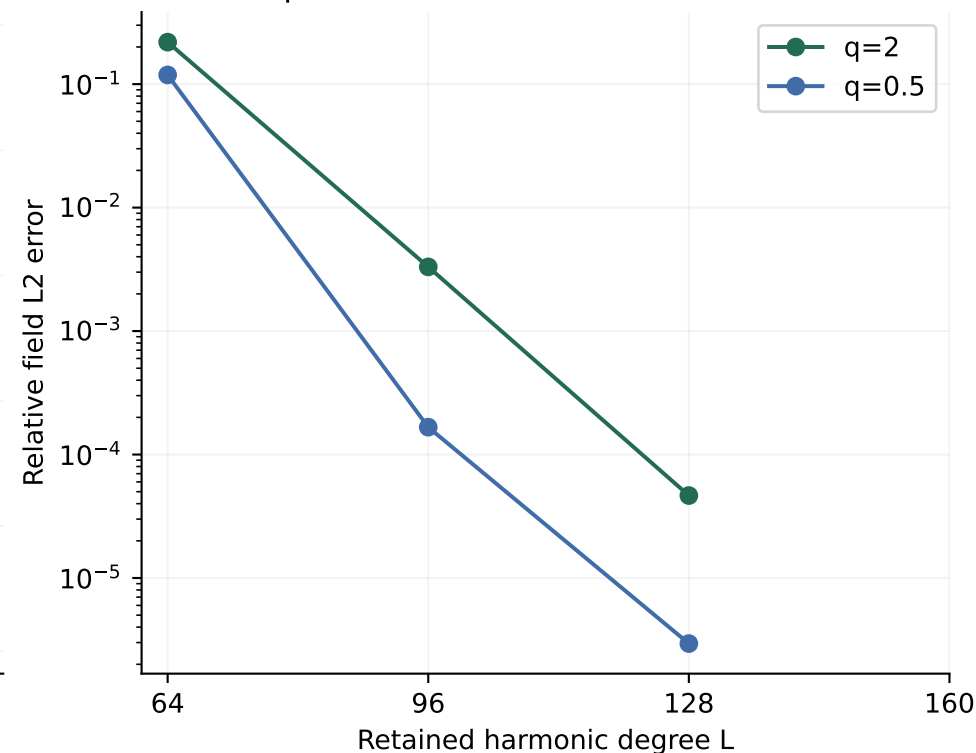

RMS 0.90392 | L=128 | 65 positive domains

Time error at the same L=64

Space error at the same initial field

The same point variance is not the same spectrum
